

Position: GIS Analyst (Full Time)

Location: Seattle, WA

Salary: Dependent on Experience

Position Description:

Ridgeline Energy LLC (<http://www.ridgelineenergy.com/>) is seeking an individual with experience in Geographic Information Systems (GIS) and geospatial data management to support the company's renewable energy development activities.

A subsidiary of Veolia Environment, Ridgeline is a renewable energy project developer focusing on Wind and Solar energy projects across the US. This position is located in the Seattle, WA office and will require limited travel. The GIS analyst will provide GIS mapping and analysis supporting renewable energy assessment, project design, permitting, construction, and operation. Work will entail day-to-day collection of geospatial data, data analysis, data management, and preparation of maps for senior GIS staff, project managers and developers. Applicant must work well both independently and as part of a team.

General Tasks

- Assist with data acquisition and data management
- Assist with refining workflow processes
- Produce hard copy and digital maps to support engineering, permitting, and development efforts.
- Work with permitting/environmental staff and engineers to see that maps are up to date and accurately reflect critical excluded areas and setbacks.
- Manage all as-built drawings and survey data.
- Map encumbrances, constraints, and other restrictions to determine suitable locations for project features.
- Support outside consultants and specialist conducting environmental permitting

Qualifications

- BA or BS Degree or the equivalent combination of education and experience and
- 2+ years experience as it relates to the job description plus
- Experience with CAD software (e.g.: AutoCAD) and conversion to GIS format
- Experience with basic Windows applications (Word, Excel, Access, etc.)
- Strong IT skills are a big plus
