REMOTE SENSING TECHNICIAN

Watershed Sciences, Inc., Portland, Oregon
Closes: Open until all positions filled.

Watershed Sciences, Inc. (WSI) is in search of multiple persons to fill full-time, regular positions for **Remote Sensing Technicians** in the Portland office. We are looking to fill these positions immediately.

About WSI:
WSI has established itself at the forefront of LiDAR production and LiDAR-derived feature extraction, and exhibits a growing presence on a national scale. Employment at WSI provides a unique opportunity to immerse oneself in this rapidly evolving and expanding remote sensing field. This job posting refers only to openings in the Portland office. For more information on the diversity of products and projects maintained by WSI, including thermal infrared remote sensing analysis and watershed modeling, please see our website at http://www.watershedsciences.com/

Desired Skills:
We are looking for individuals with the ability to successfully work independently, as well as in a team setting. The responsibilities for this position include processing and analysis of a variety of spatial data products (including LiDAR data) and general analysis support. Successful candidates for this position will possess a background in natural sciences and/or engineering, and understand the nature of quantitative data. Training will be provided by WSI. Salary will be commensurate with education and work experience. Competitive benefits package will be included.

How to apply:

Please assemble **letter of interest**, **resume with professional references** and **salary history** into ***one*** **(1)** document and send to**:**

applypdx@watershedsciences.com

Resumes will be accepted until all positions are filled. Immediate submissions are welcome and will be reviewed promptly.

No phone calls, please. Incomplete applications and auto-reply submissions will not be considered.
